DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to Connector plug, classified in class 385, subclass 55.
 - II. Claims 6-7, drawn to Method of use, classified in class 385, subclass 147.
 - III. Claims 8-10, drawn to a cross-connect apparatus, classified in class 385, subclass 75.
 - IV. Claims 11-12, drawn to Retracting method, classified in class 385, subclass 90.
 - V. Claims 13-18, drawn to Retracting device, classified in class 385, subclass88.
 - VI. Claim 19, drawn to Alignment block, classified in class 385, subclass 97.
- 2. The inventions are distinct, each from the other because of the following reasons:

 Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that
 they are not disclosed as capable of use together and they have different modes of
 operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In
 the instant case the different inventions are related to different functions and operations.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/648,822 Page 3

Art Unit: 2839

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Figures 1-7 1st embodiment of the plug
- b. Figure 8 2nd embodiment of the plug
- 5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Application/Control Number: 10/648,822 Page 4

Art Unit: 2839

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Contact Information

7. Any correspondence to this action may be mailed to:

Commissioner for Patents Post Office Box 1450 Alexandria, VA 22313-1450

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandrika Prasad whose telephone number is (571) 272-2099.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor can be reached at (571) 272-2800 ext 39. The fax number is (703) 872-9306.
